Dear jeff Kraft,

We at PG&E sincerely appreciate your business. This letter describes the Applicant Design Option provision of PG&E's Gas and/or Electric Rules 15 and 16. A copy of Gas and/or Electric Rule 15 and 16 can be obtained at <http://www.pge.com/tariffs/> or by contacting me at the number shown below.

Under the Applicant Design Option provision of PG&E's Gas and /or Electric Rules 15 and 16, you have a choice to design that portion of the new service extension normally designed by PG&E. Under this selection, you or your contractor would be responsible to design the installation of the gas and/or electric facilities within the PG&E specified project boundaries in accordance with PG&E standards. PG&E tariffs also require the designed product to be signed and stamped by a Registered Professional Engineer (PE). **If you should desire to review PG&E's Applicant Design guidelines, they are available upon request.**

Should you select this option your Design Credit for the Electric job is \$978.73.

Please email or contact me confirming your choice for Electric design. I look forward to working with you towards the successful completion of your project.

Sincerely,

Mark Zearbaugh
PG&E Representative
